Flushing cisterns

Technical specification**Low level flushing cisterns using a flush volume of 7 to 9 Litres**

1. **Jomo Nixe 13001**
with flush pipe, equipped with filling valve
No. 477### or 488###, with side connection, white and in colours;
2. **Jomorit 152001**
with flush pipe; equipped with filling valve
No. 477### or 488###, with side connection, in colours;
3. **Jomorit 160001**
with flush pipe; equipped with filling valve
No. 477### or 488###, with side connection, white;
4. **Jomo Colonia 177001**
with flush pipe; equipped with filling valve
No. 477### or 488###, with rear- or side connection, furnished with
flush interruption, white;
5. **Jomo Colonia 177201,**
with flush pipe; equipped with filling valve
No. 477### or 488###, with rear- or side connection, furnished with
flush interruption, in colours;
6. **Jomo corner cistern 180001**
with flush pipe; equipped with filling valve
No. 477### or 488###, with rear connection, white;
7. **Jomo corner cistern 182002**
with flush pipe; equipped with filling valve
No. 477### or 488###, with rear connection, in colours;

Low level flushing cisterns using a flush volume of 6 Litres

1. **Jomorit SM-6**
with flush pipe, equipped with filling valve
No. 477### or 488###, with side connection, furnished with flush-
interruption;

Concealed flushing cisterns using a flush volume of 7 to 9 Litres

1. **140003**
with flush pipe, equipped with filling valve type No. 477### or
488###, with or without flush-interruption;

Concealed flushing cisterns using a flush volume of 6 Litres

1. **141003**
with flush pipe, equipped with filling valve type No. 477### or
488###, with or without flush-interruption, front control;
2. **142003**
with flush pipe, equipped with filling valve type No. 477### or
488###, with or without flush-interruption, planchet control;
3. **TSR 144004**
with flush pipe, equipped with filling valve type No. 487012, with
flushing device No. 57808000, with adjustable double flush device,
front control;
4. **SLK 14800400**
with flush pipe, equipped with filling valve type Lokus Pokus, with
flushing device SLK, with adjustable double flush device, front
control;

Flushing cisterns

Application and use

Flushing cisterns (in combination with WC-pans) are designed as flushing devices to be connected to drinking water installations with a maximum pressure of 1000 kPa and a maximum water temperature of 30°C. Flushing cisterns using a flush volume of 6 ± 0.2 litres are intended for use in connection with WC-pans of the type 6A, according to guideline BRL-K 619.

Marking

The products are marked with the Kiwa-mark.

Place of the mark:

- on the cistern on the left side, right side, underneath or front or on the inside above water level.
- on the house of the float operated valve (filling valve).

Compulsory specifications:

name or mark of manufacturer:

- on the cistern on the left side, right side, underneath or front or on the inside above water level
- on the float valves on the body
- an EN14055 reference for the products in compliance with the European Standard EN14055

Method of marking:

- indelible;
- visible after assembly (for concealed flushing cisterns after demounting of the control panel).

RECOMMENDATIONS FOR CUSTOMERS

Check at the time of delivery whether:

- the supplier has delivered in accordance with the agreement;
- the mark and the marking method are correct;
- the products show no visible defects as a result of transport etc.

If you should reject a product on the basis of the above, please contact:

- WERIT Kunststoffwerke;W.Schneider GmbH & Co. KG
- and, if necessary,
- Kiwa Nederland B.V.

Consult the supplier's processing guidelines for the proper storage and transport methods.
