### Float operated valves

#### STATEMENT BY KIWA

With this product certificate, issued in accordance with the Kiwa Regulations for Certification, Kiwa declares that legitimate confidence exists that the products supplied by

### Fluidmaster Inc.

as specified in this product certificate and marked with the Kiwa®-mark in the manner as indicated in this product certificate may, on delivery, be relied upon to comply with

Kiwa evaluation guideline BRL-K615 "Float operated valves for flushing cisterns", dated 15-09-2019.

which covers the requirements of

EN 14124: 2004 "Inlet valves for flushing cisterns with internal overflow" dated September 2004.

Ron Scheepers

Float operated valves

---

**PRODUCT SPECIFICATION**

The products mentioned below belong to this technical approval-with-product certificate

**a) Hydraulic float operated valve 747E16B and float operated valve 747EBSCW**

Side inlet valve with inlet connection G3/8B

The model number indicating the components defined in:

- Model 747E16B: composition drawing no. 7-1397
- Model 747EBSCW: composition drawing no. 7-1286

The matrix gives valve settings. The letter "B" is defined as meaning bulk packaging.

Adjustable range

Table with adjustment ranges and acoustical class of the different types of float operated valves

Range <sup>2</sup> at a pressure of 0.05 MPa [mm]	Range <sup>2</sup> at a pressure of 1.0 MPa [mm]	Acoustical class DIN EN ISO 3822
40 - 132	65 - 128	Group I

<sup>2</sup> Measured from the water level to the lowest point of the inlet connection.

## Float operated valves

### Fitness for contact with drinking water

This product is approved on the basis of the requirements for hygienic aspects set in the "Regeling materialen en chemicaliën drink- en warm tapwatervoorziening" ("Materials and chemicals in the supply of drinking water and warm tap water Regulation" dated 01-07-2017; published in the Government Gazette).

These hygienic aspects are based on two main criteria. The product shall permanently comply with:

- The product recipe approved during the assessment procedure. This recipe is not to be changed without prior approval by Kiwa according to the Kiwa approval procedure for the hygienic aspects;
- Specific product requirements for the hygienic aspects.

The recipe and specific product requirements are laid down in the for confidentiality reasons undisclosed 'appendix hygienic aspects' to this certificate.

### MARKING

The Kiwa®-mark products are marked with the word mark "KIWA" together with  or the abbreviated word mark 

Place of the mark:

- on the body.

Compulsory specifications:

- manufacturer name or logo;
- reference to European Standard EN14124;
- acoustical group (if applicable).

Method of marking:

- Non-erasable;
- visible after assembly.

### APPLICATION AND USE

Float operated valves are intended for use as filling valves for WC flushing cisterns, and designed for connection to potable water installations with a water temperature of 30 °C maximum and a working pressure of 1000 kPa maximum.

The float operated valves, intended for use as filling valves for flushing cisterns:

- are designed with an adjustment-device which shall guarantee the filling of the flushing cistern to a water level as indicated by the producer;
- shall open, after closing, within a decrease of the water level in the cistern of no more than 30 mm.

### RECOMMENDATIONS FOR CUSTOMERS

Check at the time of delivery whether:

- the supplier has delivered in accordance with the agreement;
- the mark and the marking method are correct;
- the products show no visible defects as a result of transport etc.

If you should reject a product on the basis of the above, please contact:

- Fluidmaster Inc.

and, if necessary,

- Kiwa Nederland B.V.

Consult the supplier's processing guidelines for the proper storage and transport methods.
