- Float valve *Fluidmaster type 747E16B (with brass threaded connection)*
- Flushing device *Oliveira & Irmao, type Diamante* with interrupting flush; or Flushing device *Creavit GR.03.002.01*
- flexible hose MRG or Parigi type, DN8
- angled connecting cock Arco, type A-80 G $\frac{1}{2}$ "x G $\frac{3}{8}$ "

In various designs with the following product numbers:

- No. GR5006 For squatting wc pans
- No. GR5007 For back-to-wall independent wc pans
- No. GR5008 For children wc pans

## Flushing cisterns

---

### Application and use

The flushing cisterns are intended to operate in combination with WC-pans as hygienical flushing devices to be connected to drinking water installations with a maximum working pressure of 1000 kPa and a maximum water temperature of 25°C.

Flushing cisterns with an affective flushing volume of  $6 \pm 0,2$  Litres are designed for connection to WC-pans of the type 6A (see also Kiwa BRL-K619).

### Marking

The Kiwa®-mark products are marked with the wordmark "KIWA".

Place of the mark:

- on the cisterns on the left side, right side or front or on the inside above water level;
- on the body of the float operated valve (fitting valve).

Compulsory specifications:

name or mark of the manufacturer

- on the float valves on the body;
- on the cisterns on the left side, right side or front or on the inside above water level.

Method of marking:

- indelible;
- visible after assembly (for concealed flushing cisterns after demounting of the control panel).

### RECOMMENDATIONS FOR CUSTOMERS

Check at the time of delivery whether:

- the supplier has delivered in accordance with the agreement;
- the mark and the marking method are correct;
- the products show no visible defects as a result of transport etc.

If you should reject a product on the basis of the above, please contact:

- Canakcilar Seramik A.S.
- and, if necessary,
- Kiwa Nederland B.V.

Consult the supplier's processing guidelines for the proper storage and transport methods.
