Certification process
consists of initial and
regular assessment of:

- quality system
- product

Thermostatic mixing valves

TECHNICAL SPECIFICATION

The products mentioned below belong to this certificate:

Model. No.	Type
Rada FP1	Frost resistant outdoor tap with wall passage

REMARK

The specified products were not yet assessed for compliance with all hygienic aspects as inserted in the "Drinkwaterbesluit" (Drinking Water Decree) and outlined in the "Regeling materialen en chemicaliën drink- en warm tapwatervoorziening" (Regulation for Materials and chemical in drinking and warm tap water supply), implemented 19 July 2011, as specified in clause 4.2 of the Kiwa guideline BRL-K610.

Application and use

Frost resistant outdoor taps with wall passage are designed for application in drinking water installations with a working pressure up to 1000 kPa and a water temperature of maximum 90°C.

The recommended limits for correct operation are a working pressure of 100 kPa up to 500 kPa and a water temperature of maximum 65°C. Frost resistant outdoor taps with wall passage are designed in such a way that closing off and draining the drain pipe is not necessary if there is a risk of frost.

Marking

The Kiwa®-mark products are marked with the word mark "KIWA".

Place of the mark: on the body.

Compulsory specifications:

- name or mark of manufacturer, on the body;
- indication of temperature, on the handle;
- identification of the acoustic group, if classified, on the body;
- identification of the flow resistance class, on the body.

Method of marking:

- non-erasable;
- visible after assembly.

RECOMMENDATIONS FOR CUSTOMERS

Check at the time of delivery whether:

- the supplier has delivered in accordance with the agreement;
- the mark and the marking method are correct;
- the products show no visible defects as a result of transport etc.

If you should reject a product on the basis of the above, please contact:

- Kohler Mira Ltd.
- and, if necessary,
- Kiwa Nederland B.V.

Consult the supplier's processing guidelines for the proper storage and transport methods.
