Rimless wash down WC-pan no. 019700, with horizontal outlet;
With Cerastyle coating.

WC-pans

Application and use

The WC-pans delivered under this certificate in combination with flushing cisterns are intended for use as sanitary appliances, connected to drinking water installations with a water temperature of maximum 30 °C.

Marking

The Kiwa®-mark products are marked with the word mark "KIWA"

On the WC-pan this word mark shall be followed by

- the number 6, 7.5 or 9, indicating the flushing volume;

For WC-pans approved at a nominal flush of 4 or/and 5 litres, only the word mark "Kiwa" is permitted.

- the letter A and or C which indicates the type of flushing device to be connected:
 - **A** intended for connection with a cistern (or concealed cistern)
 - **C** intended for connection with a pressure flush valve.

Example:

The WC-pan is marked as follows:

"KIWA-6-A "

By this marking it is given that the WC-pan is Kiwa certified and intended for connection to a (concealed) flushing cistern. The minimum water volume required to perform a full flush amounts 6 ± 0.2 litres.

Place of the mark:

- on the WC-pans between the attachment holes of the lavatory seat or
- on one of the sides of the flushing rim or
- under the flushing rim of the WC bowl.

Compulsory specifications:

name or mark of the manufacturer

- on the WC-pans; between the attachment holes of the lavatory seat; on the side or under of the sides of the flushing rim;
- additional markings as specified in the European Standard EN997.

RECOMMENDATIONS FOR CUSTOMERS

Check at the time of delivery whether:

- the supplier has delivered in accordance with the agreement;
- the mark and the marking method are correct;
- the products show no visible defects as a result of transport etc.

If you should reject a product on the basis of the above, please contact:

- TURKUAZ SERAMIK SANAYI VE TICARET A.S.

and, if necessary,

- Kiwa Nederland B.V.

Consult the supplier's processing guidelines for the proper storage and transport methods.
